

The Jungian Psychoanalytic Association, New York

The 2009 Philip T. Zabriskie Lecture

**C.G. Jung's Dream Houses:
The Architecture of the Human Psyche**

by
Andreas Jung

Saturday, October 10, 2009 at 8:00 p.m.

Rosenthal Pavilion, Kimmel Center

New York University

60 Washington Square South

New York, New York

An architect and architectural preservationist for the city of Zurich, a grandson of Carl Gustav and Emma Jung, Andreas Jung is an author of *The House of C.G. Jung* and the current occupant of the Jung family home on the Lake of Zurich.

Dreams of houses were extremely important to C.G. Jung. One in particular, shared with Freud in 1909, was especially momentous, for, Jung said, "it led me for the first time to the concept of the 'collective unconscious.'" According to Jung, the house in the dream was an illustration of "layers of consciousness" from the personal to the collective, "a kind of structural diagram of the human psyche."

After building the family home in Kusnacht, Jung began a private illuminated journal in a large red leather book, he called his "Liber Novus." It contains elaborate calligraphies, mandalas and other powerful images from his "active imaginations." He then paused to build in stone, and constructed his tower in Bollingen.

For the 2009 Zabriskie Lecture, Andreas Jung will present C.G. Jung's dreams and drawings of houses, as well as photographs of the residence in Kusnacht and the tower retreat in Bollingen. The lecture marks the 100th year anniversary of C. G. Jung's first visit to North America and New York, and coincides with the publication of *The Red Book* by W.W. Norton, the October 7th opening of *The Red Book* exhibit at the Rubin Museum of Art in New York, and the first public presentation by its editor, Sonu Shamdasani.

The Philip T. Zabriskie Lecture is an annual and free event, open to those interested in the dynamics and expressions of the human psyche. It honors the memory and contribution of an eminent member of the New York Jungian community. The invited speaker is a Jungian analyst, a Jungian scholar, or an individual with expertise relevant to a Jungian perspective on the human experience.

No tickets or reservations are required. For more information, please contact the Jungian Psychoanalytic Association administrator, Allison Langerak, at allisonlangerak@gmail.com.

For more detail about the Sonu Shamdasani lecture at 7:30 pm, Friday, October 9th at the New York Academy of Medicine, 1216 Fifth Avenue at 103rd Street, consult www.philemonfoundation.org/.

For further information on the *Red Book* exhibit at the Rubin Museum of Art, go to www.rmanyc.org/.
